

Computer-Assisted Coding Interface

A Computer-Assisted Coding (CAC) system is a valuable addition to your hospital's operation because it improves the efficiency of coding and billing and provides more accurate reimbursements. To get the benefits of your CAC technology, it must be interfaced with your EHR system.

Iatric Systems has the knowledge and expertise to complete this integration quickly and cost-effectively. We have hands-on experience interfacing the major CAC systems with today's EHR systems.

Turn to us to help you quickly put your CAC technology to use and meet the October 1, 2015 ICD-10 data requirements under the Health Insurance Portability Accountability Act (HIPAA).

Let the Iatric Systems team quickly build and manage your CAC-to-EHR interface.

Since 1990, Iatric Systems has been helping hospitals achieve their integration goals regardless of the technology involved. We have deployed more than 25,000 interfaces with more than 1,300 hospitals and 800 distinct vendors.

Our interface expertise includes the building and managing of CAC interfaces. We work with you and your CAC vendor to ensure that you maximize the value of your CAC investment.

Our team helps ensure that you can:

- Automatically feed data to your CAC system including required data from your EHR
- Make archived and scanned documents available to your CAC system from your document imaging system
- Receive a query for patient data and return archived patient documents to the CAC system
- Receive patient billing codes from the CAC system and feed them back into the patient record in your EHR system

Get connected regardless of the technology involved.

You can rely on Iatric Systems to help you with all aspects of your CAC interface regardless of which CAC solution or which EHR you're using.

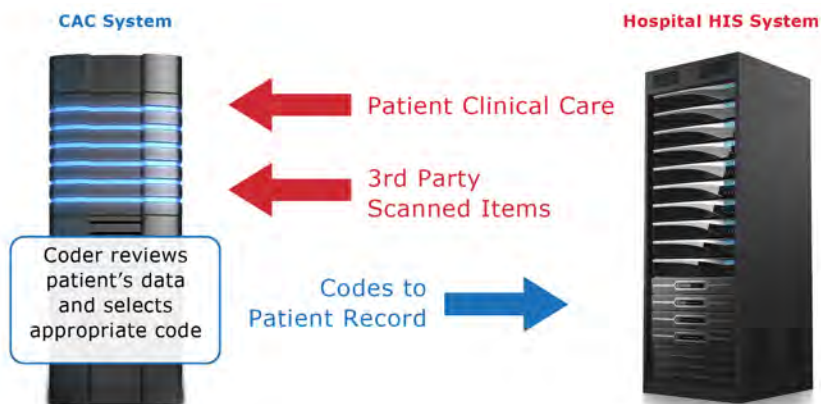

Iatric Systems has direct experience integrating the following CAC solutions with these EHR vendor systems:

EHR Vendors

- Cerner
- CPSI
- Epic
- Healthland
- HMS
- McKesson
- MEDITECH
- Siemens

CAC Vendors

- 3M
- Dolbey
- Optum
- Artificial Medical Intelligence

Key Advantages Include:

- Get reliable, fast, flexible, and cost-effective CAC interfaces
- Be prepared to take advantage of the benefits that ICD-10 brings to you and your patients and meet the HIPAA coding October 1, 2015 deadline
- Lighten the load of your understaffed IT department
