

Iowa Health System Selects Iatric Systems Security Audit Manager to Proactively Audit and Protect Patient Privacy

Iatric Systems and partner CynergisTek will deliver the industries best Privacy Breach Detection offering across Iowa Health's diverse healthcare system

Boxford, MA — March 5, 2013 — [Iatric Systems, Inc.](#), the provider of proven patient privacy monitoring solutions for healthcare organizations since 2003, announced today that Iowa Health System (IHS) has selected the Security Audit Manager (SAM) software solution due to its extensive integration capabilities and intuitive and easy-to-use interface. Iowa Health System will use Security Audit Manager to conduct automated patient privacy monitoring 24/7/365 across Epic, McKesson Horizon Medical Imaging, McKesson Horizon Patient Folder, McKesson Horizon Homecare, GE Centricity Enterprise, and their HR database.

Formed in 1994, Iowa Health System controls directly or indirectly, a regional healthcare delivery system that includes 28 hospitals, the group practice of Iowa Health Physicians, Iowa Health System Community Network, and Iowa Health Home Care. IHS has 3100 beds, and approximately 507 employed physicians practicing in more than 140 Iowa and Illinois communities.

"We selected Security Audit Manager because of its intuitive and easy-to-use user interface, proactive and flexible report capabilities, and Iatric Systems broad integration expertise that captures patient access audits across our 41 facilities and stores them in a secure, central location," said Lara Leniton Liss, IHS Attorney and HIPAA Privacy Officer. "Security Audit Manager will increase our efficiency when conducting HIPAA reviews, and help us develop a best-in-class HIPAA compliance program. We view patient privacy protections as an important element of our vision to provide the Best Outcome for Every Patient Every Time."

CynergisTek, a leading provider of IT security solutions for healthcare organizations and an Iatric Systems partner, recommended Security Audit Manager to Iowa Health System for their Privacy Breach Detection Solution. Mac

McMillan, CEO of CynergisTek and Chair of HIMSS Privacy & Security Policy Task Force had the following to say.

"Our clients expect us to stay ahead of developments in technologies that are important to their information security and privacy management needs. We recommended Security Audit Manager to IHS not just because it's a great solution for detecting and preventing privacy violations and breaches, but more importantly because Iatric Systems has an implementation process that is focused on successful adoption combining their technical expertise and our healthcare consultants knowledge. They provide a support structure that includes a 24/7 call center, technical support, and an active user group for sharing lessons learned. Clients like IHS are sophisticated enough to know they are getting more than just what is in the box."

Security Audit Manager provides healthcare organizations with one solution that handles all patient privacy auditing and incident risk management. SAM is a fully automated solution that monitors every access to patient data across the entire hospital enterprise and identifies potential HIPAA breaches within diverse software applications. By proactively monitoring access to sensitive data in real-time, SAM has the ability to detect and alert on privacy breaches, identity theft, snooping, selling patient information or other unauthorized activity that may be occurring within the enterprise.
