

Integration is Everything

PtAccess®

Unlike vendor-specific portals that may only provide data from one system, PtAccess® integrates data from any system, giving your patients one place to access all of their healthcare information. PtAccess provides an easy, low-cost way to give your patients access to their health information, and also includes Blue Button® technology. PtAccess is Stage 2 certified for View, Download, and Transmit for Hospitals and Eligible Providers.

"With the click of a mouse, we know exactly where we are with Meaningful Use."

Mike Miller
Director of Information Technology
Mecosta County Medical Center

One portal, all systems, all patient information.

PtAccess provides patients secure online access to their electronic health information and makes it simple for you to be fully compliant with this Meaningful Use requirement.

There is no need for your staff to compile and transfer electronic copies of health information to your patients when requested. Valuable time is saved. With PtAccess, your patients can:

- View, print, and securely email their health information
- Download their personal health data to multiple formats
- Request and manage appointments
- Access discharge instructions
- Review billing statements and make online payments

PtAccess also includes the U.S. Government's Blue Button® capability that allows veterans and all patients to access and download their health information in a simple format that can be read, printed, or saved on any computer.

PtAccess includes DirectConnect Gateway™

Iatric Systems DirectConnect Gateway™ is a single, standard Windows-based platform that meets all the Meaningful Use Stage 2 requirements for Direct Messaging, while also adhering to the Direct Project standards.

Ensure patient engagement with your patient portal.

To ensure patient engagement and meet Meaningful Use requirements, hospital staff needs tools and services that help them educate and train their patients about the benefits and potential of utilizing the portal. Technology paralleled with staff training is the key to adoption. Ask us about our Patient Engagement Services for more information.

Key Advantages Include:

- Complete patient information
- Standards-based integration
- Online account review with bill pay capabilities
- Electronic discharge instructions
- Patient visit history
- Clinical results reporting
- Medication order history
- Multi-language support
- Built-in Blue Button® technology
- Stage 2 certified for View, Download, and Transmit for Hospitals and Eligible Providers
- Enables Direct Messaging between hospitals, physicians, patients, and other trusted providers
- Cloud Hosting is available
