

Iatric Systems **IatriConnect Secure Messaging™** is a web-based, secure messaging solution, which supports patient-to-provider and provider-to-patient secure messaging and communications. IatriConnect Secure Messaging is 2014 Meaningful Use certified.

The IatriConnect Secure Messaging solution is architected on a standard Windows-based platform.

The IatriConnect Secure Messaging solution is fully integrated with Iatric Systems PtAccess® (patient portal).

IatriConnect Secure Messaging allows providers and their support staff to send and receive secure messages to and from their patients and other providers.

IatriConnect Secure Messaging provides its users with automated notification of new messages:

1. If user is logged into PtAccess®, new messages are flagged and displayed as new, unread messages.
2. If user is not logged into PtAccess, they will receive an automated notification in their regular email inbox, with a link to launch PtAccess and access the new message.

IatriConnect Secure Messaging was architected to meet all Meaningful Use security standards, per the NIST Approved Security Functions for FIPS PUB 140-2.
