

Visual SmartBoard™

Visual SmartBoard™ (VSB) improves patient care and fiscal management for scheduling, registration, nursing, lab, pharmacy, and other hospital departments. VSB helps hospitals focus on improving patient care and quality measures and can be the first step in moving from a fee-for-service organization to an organization that focuses on the quality of patient care.

Nursing • Radiology • Infection Control • Cardiology
Lab • PT/OT • Pharmacy • Respiratory Therapy • Quality
Dietary • Long Term Care • MIS • Medical Records

Visual SmartBoard (VSB) improves patient care, clinical quality measures, and fiscal management for all the areas in the hospital. It presents a customized view of multiple patients' key data on a single screen — in real time.

Users can catch and track potential hospital acquired conditions in the early stages, and quickly see key information to provide quality patient care and streamline their workflow.

Visual SmartBoard offers infinite uses, including:

- Quality measures compliance tracking
- Nursing status board
- Pharmacy dashboard
- Diabetes management
- Infection control
- Monitoring lab results and patient medications
- Influenza management
- Scheduling for pre-registration and registration
- Catch early stages of Sepsis
- Patient fall risk
- 30-day readmission

VSB Notification Engine (an optional component) provides real-time notification to appropriate staff when hospital-defined criteria on a customized view are met. Notification methods include email, fax, print, text, and page so immediate action can be taken. Examples include:

- Notify a physician via page or text when a patient of his/hers is transferred to the ICU
- Page your on-call pharmacist after hours when new medication orders are placed
- Fax alerts of new orders for respiratory therapists

Key Advantages Include:

- Catches and tracks hospital acquired conditions in the early stages
- Streamlines clinical staff workflow
- Presents real-time data for multiple patients on one screen
- Allows hospital to define custom criteria for each display
- Provides easy navigation to MEDITECH routines and web URLs
- Uses colors and sounds to alert users to important information such as abnormal lab values, next intervention due, and more
- Create part B Medicare Medical Necessity for offsite facilities
