

## **Iatric Systems Partners with MindLeaf Technologies**

Partnership will offer Iatric Systems Security Audit Manager™ and MindLeaf consulting services to stand-alone clinics and physician offices

**Boxford, Mass. – Jan. 12, 2016** – [Iatric Systems, Inc.](#), a comprehensive healthcare IT integration company, and MindLeaf Technologies, Inc., a medical compliance and medical support services company, have partnered to offer Iatric Systems Security Audit Manager™ to urgent care clinics, community clinics, group practices, and outpatient clinics.

MindLeaf will offer its medical compliance and support services in conjunction with Security Audit Manager, which integrates and correlates data of all access to Protected Health Information (PHI) from diverse systems to proactively detect breaches and automate patient privacy monitoring. To ease the burden on clinic IT staff while also reducing upfront costs, Security Audit Manager will be delivered to clinics via a Software as a Service (SaaS) model.

By combining MindLeaf's consulting services with Security Audit Manager, which was named KLAS Category Leader in the Patient Privacy Monitoring segment in 2014, clinics and other practices can replace manual monitoring with automated processes that better protect patient privacy.

"Providers are looking for affordable, easy-to-use privacy and security solutions that allow them to focus more attention on patients and productivity, while also helping their organization remain compliant in the areas of privacy, security and breach notification," says Paresh Shah, President of MindLeaf Technologies. "As a leader in healthcare compliance services, it is important that we partner with a company whose software reflects a keen understanding of these issues. This is exactly what we found in a partnership with Iatric Systems and its Security Audit Manager solution."

The partnership between Iatric Systems and MindLeaf is particularly powerful because it brings sophisticated privacy solutions to smaller healthcare providers that might otherwise not be able to adopt such robust systems.

"Healthcare organizations of all shapes and sizes need tools and services to help protect patient privacy, show who is accessing patient data at all times, and detect any inappropriate behavior or breaches. This is exactly what Security Audit Manager was designed to do, and this partnership affords us the opportunity to bring our leading software to a new market segment," said Marc Andiel, Senior Vice President of Professional Services of Iatric Systems. "Partnerships are key in the current healthcare technology environment. MindLeaf Technologies is a leader in compliance and support consulting, and we are excited for this partnership."

Iatric Systems will be exhibiting at the HIMSS16 tradeshow in Las Vegas, Nevada, Feb. 29-March 4 in [booth #7730](#). To schedule a meeting, contact Iatric Systems at [info@iatric.com](mailto:info@iatric.com).
