

Launch Integration Toolkit™

Launch Integration Toolkit™ makes it possible for your caregivers to view a more complete patient health record by viewing patient data in other information systems as well as your primary EHR.

Now you can save your clinicians time every day. Launch Integration Toolkit makes it fast and easy for them to access all of your information systems, plus launch executable programs and external URLs, right from the navigation in your EHR.

- Simplify the process of accessing information systems that are outside of your EHR with fewer passwords and entries
- Launch HIEs from inside your EHR
- Deliver patient information more quickly to improve staff efficiency and patient care

Achieve true interoperability with Launch Integration Toolkit

Link to other software systems and websites right from your EHR system.

Every additional task your caregivers must perform when attending to patients reduces their productivity and affects overall patient care. Having to leave the EHR to log into another information system to gather pertinent patient data is tedious and time-consuming.

Launch Integration Toolkit eliminates this step. It makes it fast and easy for caregivers to simply click on navigation buttons placed within your EHR and instantly access outside information systems for data needed to provide patient care.

Launch Integration Toolkit minimizes keystrokes while maximizing productivity and patient care.

In order to provide you an easier implementation, we have custom coding executable programs for these and other third-party vendors:

- ChartMaxx®
- eClinicalWorks
- Epic
- OBIX®
- PatientKeeper®
- eCardio
- ReDoc®
- ePreop™

Key Advantages Include:

Launch Integration Toolkit provides caregivers with a more complete patient care record by seamlessly linking patient screens within your EHR with patient screens in information systems outside your EHR.

- Any third-party vendor information systems such as EDIS and HIE
- Iatric Systems applications
- Any external executable program EDIS and HIE
- Specific website URLs

For a demonstration or more information on **Launch Integration Toolkit**, or any other Iatric Systems products or services, please contact us using the information below.
