

6.x Services

Partnering for success with 6.x

For more than 20 years, Iatric Systems has been partnering with MEDITECH users to help them enhance their systems and get the most from their HIS investment. Continuing this effort, the Iatric Systems team started working with MEDITECH 6.x beta sites and industry leaders — prior to its launch — to gain a full understanding of the platform from the inside out.

Now, with a track record of supporting many successful implementations, Iatric Systems is your most trusted 6.x resource. You can confidently partner with Iatric Systems to help you overcome the complexities and reduce the risk of migrating to MEDITECH 6.x, while enhancing its IT, clinical, and financial capabilities.

"Iatric Systems' expertise in converting our BlueChip (Omtool) archive and images to MEDITECH SCA was much appreciated during an already packed implementation schedule. Iatric Systems was very helpful in converting some of our more complex MAGIC reports to the 6.x platform. We are also looking forward to utilizing the iDAD product that we have recently purchased to supplement our Data Repository."

Lori Cole
Chief Information Officer
Wayne Memorial Hospital

Why Iatric Systems is your most trusted MEDITECH 6.x resource.

Get the most from your 6.x implementation by choosing the partner with more than 20 years of experience providing seamless application enhancements to MEDITECH.
