iatricSystems™

Physician Office Integration

Physician Office Integration allows hospitals to receive orders from physician office EMR systems and send the patient's lab results, radiology reports, and other patient information to the physician office EMR system. It eliminates the need for faxing and provides caregivers a cost-effective way to exchange patient data.

Physician Office Integration is ONC-ACB certified for Stage 2 Meaningful Use, Menu Set Objective 6: Provide structured electronic lab results to ambulatory providers.

2014 EDITION

Share HIS data with physicians' EMR systems

Physician Office Integration makes the process of sending patient data from your HIS to physician practices easy and cost-effective. You can send lab results, radiology reports, post patient charges in-house, and send other patient information to a physician's Electronic Medical Record (EMR) system. When it's time to add new physician practices to your network, Physician Office Integration leverages existing HL7 interfaces to quickly and efficiently make the connections.

Receive electronic orders with a bi-directional exchange

Physician Office Integration-Inbound interface allows physicians to enter outpatient orders right from their EMR. This is an efficient process whereby your hospital receives orders from physician practices and when the tests are complete, the results are automatically sent to the physician office EMR system. Physician offices can also send patient charges for posting in the hospital's in-house HIS billing system.

Improve workflow with Work List capability

As orders arrive in the hospital HIS, the advanced Work List streamlines the registration and provides flexibility in managing orders. The result is faster turnaround times not only for the registration and order process, but also for results. This helps improve customer services and increase physician satisfaction.

Powered by EasyConnect Jaguar

Physician Office Integration is powered by EasyConnect Jaguar, an advanced interface engine that allows you to connect to HIEs or healthcare systems such as ED, PACS, Monitors, Transcription, Surgical, Dietary, and anywhere you need to send and receive data from your HIS. If you need to expand your connections beyond physician EMRs, Physician Office Integration can be upgraded to the full-use EasyConnect Jaguar license.

Save Time and Money with Implementation Services

iatricSystems implementation services team consists of Project Managers and Systems Analysts with decades of health IT experience. Their depth of experience with Physician Office Integration deployments saves time and ensures your hospital achieves an efficient and smooth implementation while freeing your staff to concentrate on other important IT projects.

"Physicians wanted the same features that independent labs were offering them — the ability to pass laboratory results directly into the physician offices' EMR software. With Physician Office Integration, we can do this and so much more. Physician satisfaction has already improved, and we feel that this is a significant step for us in becoming the provider of choice in our community."
    Kay Down - Union Hospital, Elkton, MD

Physician Office Integration is ONC-ACB certified for Stage 2 Meaningful Use, Menu Set Objective 6: Provide structured electronic lab results to ambulatory providers.

Physician Office Integration may be purchased with iatricSystems DirectConnect Gateway™, a cost-effective, secure transport solution that includes the Direct Messaging specification.

Key Advantages Include:

- Improves physician satisfaction and patient care
- Demonstrates electronic exchange of information for Meaningful Use
- Improves registration with comprehensive and flexible integration
- Provides a competitive advantage over commercial labs
- Accommodates hospital business rules with comprehensive and flexible orders
- Increases hospital revenue by electronically processing patient charges in-house

iatricSystems, well known for its expertise in systems integration, has provided integration with more than 800 healthcare IT vendors — and more than 85 of those are physician EMR systems.
