

## **HEALTHLAND PARTNERS WITH IATRIC SYSTEMS TO SUPPORT MEANINGFUL USE STAGE 2 FOR RURAL AND CRITICAL ACCESS HOSPITALS**

*Partnership allows rural healthcare facilities to better manage Meaningful Use Stage 2 attestation requirements*

**Minneapolis, Minn. and Boxford, Mass. – June 11, 2014** – To help hospitals smoothly administer complex Meaningful Use attestation, [Healthland](#), the nation's largest provider of integrated solutions to rural community and critical access hospitals, today announced that it has partnered with [Iatric Systems](#), a comprehensive healthcare IT integration company dedicated to improving the delivery of care through technology.

Through this partnership, Healthland and Iatric Systems will help rural facilities streamline their Meaningful Use attestation efforts by automating the calculation, tracking and reporting of Clinical Quality Measures (CQMs) and Meaningful Use core and menu objectives. Integrated into Healthland's electronic health record (EHR) solution, Iatric Systems Meaningful Use Manager™ gives Healthland clients access to a solution that provides a comprehensive and accurate view of their compliance status for all Meaningful Use Stage 2 requirements.

"For many rural hospitals and providers, Meaningful Use Stage 2 attestation is critical to the success of their facility," said Pete Ketchum, Director of Product Management at Healthland. "Healthland's partnership with Iatric Systems helps our clients more effectively measure and monitor their Meaningful Use progress."

"With the ONC-ACB 2014 certified Meaningful Use Manager solution, Healthland customers can now eliminate any guesswork, manual tracking and tedious monitoring, as well as keep stakeholders well informed throughout the Meaningful Use attestation process," said Frank Fortner, President of Iatric Systems. "Having successfully implemented Meaningful Use Manager in hundreds of organizations, we're excited to enable Healthland's clients to not only automate their Meaningful Use initiatives, but also simplify the overall process so hospital and clinic staff can focus on delivering quality patient care rather than compliance tracking."

### **About Healthland**

Headquartered in Minneapolis, Minn., Healthland is America's largest provider of integrated technology solutions to rural community and critical access hospitals. Software and services from Healthland, including the Centriq® electronic health records (EHR) solution, help customers share patient information across care settings to coordinate treatment, improve outcomes, and drive patient satisfaction.
