Visual SmartBoard

What is Visual SmartBoard (VSB)?

- VSB displays the most current patient data available based on a Master NPR report
- Data refreshes at customer defined intervals
- Data is displayed in a spreadsheet format
- VSB worklists are created based on the workflow requirements of many different types of MEDITECH users, including Financial and Clinical end-users
- Data can be filtered to provide a pared down version or alternate display

Visual SmartBoard

Functionality

- Color may be utilized to alert the user to abnormal information or may be assigned based on their parameters
- Audio cues may be enabled to alert the user to changes to the worklist based on data or time parameters
- Hovers provide additional information that is associated with the primary data displayed in the cell
- Double-clicking on any row provides quick access to the most frequently utilized routine or menu
- Cells may have a right-click routine assigned that is related to the data that is displayed

Visual SmartBoard

Visual SmartBoard

Clinical Library: Infection Control

Purpose of view: For use by clinicians who monitor patients for infectious processes, this VSB view provides a display of inpatients who:

- Have an active infectious process, as identified by having a positive MICRO result
- Are at risk for infection, as identified by:
 - Post-operative status
 - Active NUR interventions such as Foley Catheter, Mechanical Vent, Central Line, Dressings
 - NUR Plan of Care
 - Antimicrobial therapy prescribed
 - Diabetic medication prescribed

Visual SmartBoard

Clinical Library: Infection Control (Continued)

- Use of red and bolded text/numbers alert the clinician to abnormal results or if the patient is on Isolation
- Additional patient detail is provided in a number of hovers provided with this worklist:
 - Patient Account and Unit Numbers
 - Attending Physician Contact Information
 - LAB test collection time and reference ranges
 - MICRO culture results with Organism detail
 - MICRO Organism Sensitivities

ACLS
ACLS Certified
Comment: Class: 11/01/08
CEU: 8

Visual SmartBoard

Clinical Library: NUR Skill List

Purpose of view:

- Provides a display of NUR skills that are associated with an employee. These skills are defined in the NUR Skills Dictionary
- Quickly identify available parameters
- Licensing dates can be easily managed:
 - Blue when date occurs within the next thirty days
 - Red when date has passed
- Oversee critical administrative deadlines: ACLS, CPR, TB skin test, next evaluation date

Visual SmartBoard

Clinical Library: Pharmacy Dashboard

- Can contribute to efficiency in Pharmacists' workflow by providing a list of medications that require processing
- Medication orders populate this list based on the following criteria:
 - Unverified by Pharmacist
 - Held by nursing staff
 - One-time medication orders
- Text displays in **red/bold** when a medication is in an Unverified status
- Text displays in **blue/bold** when a medication is being held by nursing staff

Visual SmartBoard

Clinical Library: Influenza Profile

Purpose of view:

- Provides a display of the data that can assist in managing Influenza patients during an outbreak.
- Patients populate the list based on the following criteria:
 - Identified Influenza symptoms
 - Positive Flu antibody test
- Use of color and bolded text/numbers alert the clinicians to patients on Isolation, abnormal LAB values or abnormal Vital Signs
- Includes ‘Clinician Exposure’ report that lists all of the staff members that have had contact with a specific patient – per documentation field in MEDITECH

Visual SmartBoard

Clinical Library: Anticoagulation

Purpose of view:

- Provides a list of patients that have been prescribed anticoagulation therapy
- Patients populate the list based on the following criteria:
 - Prescribed a medication from the drug class
20:12.04
- Use of color and bolded data alerts the clinician to patients with abnormal LAB values

Visual SmartBoard

Clinical Library: Anticoagulation (Continued)

- Hover over 'Anticoagulant' field provides details of the medication(s) prescribed:
 - Rx number
 - Full Sig
 - Start/Stop date and time
- Hover over 'Last Dose' field provides details as to when the medication was last administered
