

Health Information Exchange Services

Confidently meet your goals related to connecting to a Health Information Exchange (HIE), Regional Health Information Organization (RHIO), or State Designated Entity (SDE) by partnering with the Professional Services team at Iatric Systems.

You'll receive expert guidance in building a strategic roadmap that matches your implementation goals and your budget. Iatric Systems can help you meet any of your challenges, including:

- Needs assessment
- Research
- Planning
- Identifying and evaluating resources
- Preparing timelines and action steps
- Implementation
- Migration
- Connecting to an existing HIE, RHIO, or SDE

Our Iatric Systems Professional Services team has the knowledge and experience to help you make this complex task of connecting to a HIE a complete success.

Call on the experts to help you be successful.

Whatever your needs in relation to an HIE, RHIO, or SDE, Iatric Systems Professional Services team can help you meet them.

- Determine the value of connecting or participating
- Conduct the planning and strategy to build your own exchange or connect to an existing one
- Supplement your limited resources for any aspect of HIE, RHIO, or SDE participation
- Assist you at any or all steps, including research, planning, and implementation

Assessment

- Evaluate your existing systems, see how data is currently transferred, establish your goals, etc.
- Recommend the right action plan
- Uncover the issues with your current connections and determine why you are not achieving success, then provide a roadmap to meet your defined goals

Strategy Development

- Build a defined plan that avoids wasted IT dollars and makes the most of your valuable resources
- Implement an HIE, RHIO, or SDE plan to quickly and efficiently drive your desired outcomes
- Help you choose the right path if you have multiple options
- Determine how to find the right resources (or Iatric Systems can provide the resources), set the timeline, and establish the action steps needed to make connectivity a reality

Whatever your needs, there's no better option for making your HIE, RHIO, or SDE connections work smoothly than Iatric Systems Professional Services team.

If you are a state HIE, SDE, RHIO or ACO contact us today for specific services to meet your needs.

Iatric Systems Professional Services

Team Experience:

- Worked with state-level and regional HIEs across the nation
- Helped implement multiple private RHIOs, working with several platforms, including interface engines, EMPIS, and architectures
- Led teams through the RFP process and management of system migrations
- Provided executive level program management and technical consulting services to Missouri Health Connection
- Provided ongoing consulting and project management for Idaho Health Data Exchange
- Worked with multiple RHIOs in California, Texas, New York, Massachusetts and others
- Provided all project management, technical vendor management, and technical consulting to HealthlinkNY
- Participated in the sustainability, interoperability, and architecture of various New York Department of Health and New York eHealth Collaborative workgroup committees
- Assisted with the migration of Regional New York RHIOs to the shared state-side platform
