

## **"Best in KLAS" Report Names Security Audit Manager™ #1 for Patient Privacy Monitoring for Fourth Consecutive Year**

Marking its 15<sup>th</sup> anniversary, Security Audit Manager is implemented in more than 1,000 North American facilities to help enhance patient privacy

**Boxford, Mass., Jan. 30, 2018** – For the fourth consecutive year, the [Iatric Systems, Inc.](#) Security Audit Manager™ solution was named the leader in the Patient Privacy Monitoring category of the *2018 Best in KLAS: Software & Services* report. [Security Audit Manager](#), which also was named Category Leader in the 2014, 2015/2016, and 2017 reports, ranked highly in each category by customers with an overall score of 91, an increase over last year's score.

Initially released in 2003, Security Audit Manager has been implemented in more than 1,000 facilities throughout the U.S. and Canada. Using analytics, filtering, and behavioral analysis, Security Audit Manager works with all electronic health records (EHRs) to identify inappropriate access to Protected Health Information (PHI) across disparate systems. By leveraging a unique analytic strategy, Security Audit Manager filters out false positives, and ranks suspicious events so those with the highest risk and likelihood are marked for review first.

"We have relied on Security Audit Manager for several years, and Iatric Systems continues to be a strong, strategic partner," said RaeAnn Isaacson, Corporate Privacy Officer at UnityPoint Health. "Iatric Systems is always working on new and better ways to protect patient privacy so our patients know they can trust us completely to keep their health matters private."

"We are thrilled to receive this award for the fourth consecutive year. Protecting patient data is one of the most important tasks healthcare organizations have, and we take our role in helping them keep this data secure very seriously," said Frank Fortner, President of Iatric Systems. "Since 2003, we have continually used our extensive healthcare IT experience and software development expertise to reinvent how patient privacy is protected."

At HIMSS18, Security Audit Manager will be marking its 15<sup>th</sup> anniversary, and the strong history of excellence will continue as Iatric Systems formally takes Security Audit Manager to the next evolution. Security Audit Manager iQ™ combines expert-based deterministic algorithms and machine-learning in a hybrid system to find suspicious behavior. It is building on the best of both environments to improve detection and reduce false positives. The review process has been further streamlined by extending behavioral analysis capabilities to user-defined roles. Security Audit Manager iQ is a complete solution that helps organizations identify, detect, prevent, and respond to privacy incidents and breaches.

"We are looking forward to being a beta site for Security Audit Manager iQ," said Miranda Brown, Patient Privacy Analyst at West Virginia University Health System. "As privacy managers, policing insider threats is just as vital as defending against external breaches. As threats to patient privacy become more complex, we must do everything possible to earn and maintain the trust of our patients and our communities, and we view our partnership with Iatric Systems as supporting that critical mission."

Security Audit Manager iQ will be showcased throughout HIMSS18 at the Iatric Systems exhibit, booth #7505, from March 5-9 in Las Vegas. To schedule a meeting, contact Iatric Systems at [info@iatric.com](mailto:info@iatric.com).

### **About KLAS**

KLAS is a data-driven company on a mission to improve the world's healthcare by enabling provider and payer voices to be heard and counted. Working with thousands of healthcare professionals, KLAS collects insights on software, services and medical equipment to deliver reports, trending data and statistical overviews. KLAS data is accurate, honest and impartial. The research directly reflects the voice of healthcare professionals and acts as a catalyst for improving vendor performance. To learn more about KLAS and the insights we provide, visit [www.KLASresearch.com](http://www.KLASresearch.com).

### **About Iatric Systems, Inc.**

Iatric Systems is a healthcare technology company dedicated to helping hospitals enhance their IT investments. We do so with our diverse healthcare experience, an extensive partner network, and our proven capabilities in interoperability, patient privacy, and EHR optimization. For more than 25 years, Iatric Systems has delivered solutions to more than 1,300 healthcare organizations and has integrated more than 800 vendor solutions.
