

## MACRA Assist™

The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) requires hospitals with hospital-based physicians to track and report on quality measures by a specific deadline — or face penalties that impact payments.

Assessing your hospital's eligibility and setting up the process for complying with MACRA is a complicated endeavor, and can consume valuable time and resources. Iatric Systems can help.

Let our professional services team...

- Determine exactly who is required to participate in the MACRA program
- Identify what needs to be done
- Put a plan in place to meet the requirements by the deadlines

## See why MACRA can be confusing

Complying with MACRA starts with determining eligibility. Here are just two of the criteria affecting eligibility — and there are many more:

1. Clinicians who have more than \$30,000 in Medicare charges and more than 100 Medicare Part B patients per year
2. Clinicians who furnish 75% or more of their professional services in POS 21, 22, and 23 or inpatient, campus outpatient hospital, or emergency room setting

MACRA Assist can ensure that your hospital has a plan in place to be in full compliance with this regulation.

## Overcome the complexity of MACRA

Our professional services team understands this complex set of regulations and can help you develop a plan to be in full compliance.

### MACRA Assist provides:

- Evaluation of hospital environment to identify all eligible/required clinicians
- Identification of Quality Metrics by Eligible Clinician or Eligible Clinician set
- GAP Analysis for Eligible Clinician or Eligible Clinician set, taking into account documentation needed to fulfill each measure
- Identification of Improvement Activities for Eligible Clinician
- Ensuring there is appropriate organization awareness
- GAP Analysis of Improvement Activities for physicians
- Documentation of decisions
- Plan for data capture for hospitals
- Attestation plan
- Knowledge transfer about selections, reporting, and attestation

### Key Advantages Include:

- Eliminate the stress of scrambling to meet the criteria
- Rely on our experts who have years of experience helping hospitals comply with healthcare reporting regulations
- Let our team uncover shortcomings and areas that need attention
- Take the burden off your clinicians so they can focus on patient care
- Get the level of funding you deserve
- Avoid penalties
- Establish a clear path for what needs to be done to meet the criteria
- Identify key stakeholders and coordinate resources across departments
- Submit performance data to meet the criteria
